PROFESSIONAL SUMMARY

Software engineer with 2+ years of industry experience across automated quality engineering, full-stack web development, and iOS apps. Builds production web and mobile experiences and takes features through the software lifecycle, from data design and user interfaces to cloud backends and automated testing.

EDUCATION

Master in Computer Application (MCA)

Bennett University

Bachelor of Computer Applications (BCA)

Chaudhary Charan Singh University

WORK EXPERIENCE

Software Engineer | Red Piranha

Drive software reliability and automated quality engineering using Pytest, Playwright, Selenium, and Robot Framework.

Full Stack Developer | Jeffa Industries

- Contributed for one year to production web applications, including the live JEFFA storefront, using modern web stacks and database architectures.
- Improved responsive product and collection pages, navigation, cart and checkout flows, customer accounts, order tracking, and returns support.

Software Engineer Intern | Cetpa Infotech

Built foundations in web development, database design, and software testing.

PROJECTS

DARK-Salon | Full-Stack Booking Platform

Live site: darkglamsalon.web.app

- Built with Next.js, React, Firebase, and Bootstrap; includes authentication, service browsing, cart and checkout, booking management, and an admin dashboard.
- Implemented three role-based dashboards: Admin (manage services, workers, and orders), User (book services, track status, make payments), and Worker (view assigned tasks and customer details).
- Integrated Firestore database for real-time updates, Google Authentication, and Razorpay payment gateway for secure transactions.

[Personal Portfolio Website | HTML, CSS, JavaScript](#)

Live site: nishit-singh0808.github.io/Portfolio/

- Built a responsive portfolio website showcasing professional experience, projects, technical skills, and personal interests.
- Added interactive sections, project links, and contact links.

[Vision CoreML Fitness and Food Classifier | iOS Application](#)

- Built an iOS app using Apple Vision and Core ML to classify food images and identify workout equipment.
- Added workout suggestions based on recognized equipment.
- Estimated nutritional information from food classifications.
- Combined fitness and nutrition features in a single mobile experience.

[DARK Google Login | SwiftUI iOS App](#)

- Built a salon app in SwiftUI with Google Sign-In authentication.
- Integrated Firebase for backend services.
- Added location services and address management.
- Designed a dark-themed interface for browsing and managing salon-related information.

SKILLS

- **Test automation:** Pytest, Playwright, Selenium, Robot Framework
- **Web:** Next.js, React, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Shopify
- **Mobile and ML:** Swift, SwiftUI, Apple Vision, Core ML, LLM integration
- **Data and tools:** Firebase, Cloud Firestore, MySQL, Git, GitHub, GitLab, PowerShell

SOFT SKILLS

- Problem-solving and analytical thinking
- Clear communication
- Teamwork and collaboration
- Attention to detail
- Adaptability and willingness to learn
- Time management and prioritization
- Ownership and follow-through
- Quality-focused mindset
